

NISHANT PRATAP SINGH

Data Analyst

☎ +91-9306334322 ✉ npstanwar09@gmail.com [in linkedin](#) [github](#)

Summary

Data Analyst with experience building end-to-end analytics solutions using Python, SQL, Power BI, and Streamlit. Delivered **10 end-to-end** Business Intelligence dashboards and analyzed datasets over 3.8 million records across sports, healthcare, retail, and fitness domains.

Skills

Languages and Databases: Python, SQL (MySQL, PostgreSQL)

Machine Learning: Scikit-learn, Predictive Modeling, Feature Engineering, Gradient Boosting, Statistical Analysis

BI and Visualization: Power BI (DAX, Power Query), Streamlit, Matplotlib, Seaborn, Plotly, Excel, Data Visualization

Tools and Analytics: Git, Jupyter Notebook, ETL Pipelines, KPI Reporting, EDA, Data Cleaning, Stakeholder Communication, Data-Driven Decision Making

Experience

Labmentix Pvt. Ltd.

December 2025 – June 2026

Data Analyst Intern

- Provided **10 end-to-end Business Intelligence dashboards** for sports, insurance, retail, and fitness projects using **Power BI** and **Streamlit**, enabling stakeholders to monitor KPIs through interactive visualizations.
- Improved reporting accuracy and data consistency across **5+ data sources totaling over 4 million entries** by automating ETL pipelines and data cleaning workflows using **Python (Pandas, NumPy)** and **SQL**.
- Conducted Exploratory Data Analysis (EDA) and feature engineering on large-scale datasets to identify trend anomalies and operational inefficiencies supporting stakeholder decision-making.
- Optimized API integration and client-side application performance for the Tennis Analytics Platform, improving dashboard responsiveness and real-time query performance.

Projects

Tennis Analytics Platform (Team Project)

May 2026 – Jun 2026

Internship Project

- Built an interactive **Streamlit** frontend for a tennis analytics platform using the **SportRadar API**, providing real-time analytics across **1,000+ players** and **6,500+ competitions**.
- Integrated **SQL Server** and **MongoDB** to manage structured ranking data and semi-structured match data supporting player and tournament analysis.
- Developed player search and benchmarking modules supporting **1,000+ players** across **74 countries**, enabling faster athlete comparison.
- Implemented responsive filtering and UI state synchronization to support smooth exploration of **1,000+** player profiles during complex searches.

Strava Fitness Analytics

Mar 2026 – Apr 2026

Internship Project

- Consolidated **8 Fitbit exports** containing over **3.8 million observations** using **Python** and **PostgreSQL**.
- Performed exploratory data analysis on **2.4M+ heart-rate** measurements and **1.3M+ MET** observations to identify activity and health trends.
- Designed an interactive Power BI dashboard with **20+ KPIs** visualizing sleep, activity, calories, and cardiovascular metrics.
- Segmented users into behavioral groups to generate actionable insights for personalized fitness recommendations, strengthening user engagement and retention.

- Evaluated 4 regression models using **Python**, **Pandas**, and **Scikit-learn** selecting Gradient Boosting with $R^2 = 0.879$, RMSE = 4335 as the best-performing model.
- Analyzed 6 customer features through EDA and feature engineering, identifying **Smoking Status (67.7%)**, **BMI (19.0%)**, and **Age (11.9%)** as the major cost drivers.
- Created preprocessing pipelines using **ColumnTransformer**, **OneHotEncoder**, and **GridSearchCV** to evaluate **4 regression algorithms** within a unified machine learning workflow.
- Presented business recommendations that prioritized **3 major pricing factors** (Smoking Status, BMI, and Age) for premium estimation and underwriting decisions.
