

NISHANT PRATAP SINGH

Data Analyst

+91-9306334322 npstanwar09@gmail.com [linkedin](#) [github](#) [portfolio](#)

Summary

Data Analyst with hands-on experience designing end-to-end analytics solutions across Python, SQL, Power BI, and Streamlit. Delivered 10 business intelligence dashboards and analyzed 3.8M+ records spanning sports, healthcare, retail, and fitness domains, translating complex datasets into actionable business insights.

Skills

Languages and Databases: Python (Pandas, NumPy), SQL (MySQL, PostgreSQL)

Machine Learning: Scikit-learn, Predictive Modeling, Feature Engineering, Gradient Boosting, Regression Analysis, Statistical Analysis

BI and Visualization: Power BI (DAX, Power Query), Streamlit, Matplotlib, Seaborn, Plotly, Excel, Data Visualization

Tools and Analytics: Git, Jupyter Notebook, ETL Pipelines, API Integration, KPI Reporting, EDA, Data Cleaning, Google Workspace (Sheets, Docs, Slides) Stakeholder Communication, Data-Driven Decision Making

Experience

Labmentix Pvt. Ltd.

December 2025 – June 2026

Data Analyst Intern

- Delivered **10 end-to-end Business Intelligence dashboards** across sports, insurance, retail, and fitness projects with **Power BI and Streamlit**, enabling stakeholders to monitor KPIs through interactive visualizations.
- Enhanced reporting accuracy and data consistency across **5+ data sources totaling over 4M+ entries** by automating ETL pipelines and data cleaning workflows using **Python (Pandas, NumPy)** and **SQL**.
- Conducted Exploratory Data Analysis (EDA) and feature engineering on large-scale datasets to identify trend anomalies and operational inefficiencies, supporting stakeholder decision-making.
- Optimized API integration and client-side application performance for the Tennis Analytics Platform, improving dashboard responsiveness and real-time query performance.

Projects

Tennis Analytics Platform (Team Project)

May 2026 – Jun 2026

Internship Project

- Built an interactive **Streamlit** frontend for a tennis analytics platform via the **SportRadar API**, delivering real-time analytics across **1,000+ players** and **6,500+ competitions**.
- Integrated **SQL Server** and **MongoDB** to manage structured ranking data and semi-structured match data for player and tournament analysis.
- Developed player search and benchmarking modules supporting **1,000+ players** across **74 countries**, accelerating athlete comparison.
- Implemented responsive filtering and UI state synchronization to support smooth exploration of **1,000+** player profiles during complex searches.

Strava Fitness Analytics

Mar 2026 – Apr 2026

Internship Project

- Consolidated **8 Fitbit exports** totaling **3.8 million observations** using **Python** and **PostgreSQL**.
- Performed exploratory data analysis on **2.4M+ heart-rate** readings and **1.3M+ MET** records to identify activity and health trends.
- Designed an interactive Power BI dashboard with **20+ KPIs** covering sleep, activity, calories, and cardiovascular metrics.
- Segmented users into behavioral groups to generate actionable insights for personalized fitness plans, strengthening engagement and retention.

- Evaluated 4 regression models in **Python**, **Pandas**, and **Scikit-learn** selecting Gradient Boosting ($R^2 = 0.879$, RMSE = 4335) as the top performing model.
- Analyzed 6 customer features through EDA and feature engineering, identifying **Smoking Status (67.7%)**, **BMI (19.0%)** and **Age (11.9%)** as leading cost drivers.
- Created preprocessing pipelines using **ColumnTransformer**, **OneHotEncoder**, and **GridSearchCV** to benchmark **4 regression algorithms** in a unified ML workflow.
- Presented business recommendations prioritizing Smoking Status, BMI, and Age for premium estimation and underwriting decisions.
